## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The examiner has not found a base station controller for a wireless network with processor boards comprising a local reference clock having a frequency of 8 KHz, wherein the board receives and compresses groups of 160 PCM speech samples into 20 ms vocoded frames of compressed speech data; a timing unit that generates and transmits timing frames/packets to the board; wherein the processor board realigns its local reference clock with time information contained in the received timing frames/packets whenever the local reference clock drifts outside of a predetermined time window of approximately 2 ms [which is greater than the prior art time window of 1.25 ms at a frequency of 8 KHz with 160 PCM samples compressed into 20 ms vocoded frames, (*see* Applicant Specification, page 3, line 18 to page 4, line 4)].

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
